Inspiration is an unconscious burst of creativity in a literary, musical, or other artistic endeavour. The concept has origins in both Hellenism and Hebraism. The Greeks believed that inspiration or "enthusiasm" came from the muses, as well as the gods Apollo and Dionysus

Life is the sum total of experience gained by an individual from birth to death. Accordingly man comes in contact with the world of object and ekes out himself for pleasure or pain ,joy or sorrow and failure or success. His reactions are dependent upon the quality and texture of his mind and intellect equipment. There is an infinite variety in the texture and composition of equipment varying from individual to individual. Thus the world provides different and distinct visions according to the equipment of the ndividual who projects them.

Retired as Additional chief Engineer, Chennai Zone 31 July 1994

Colonel Ganesan was wintering Leader from Nov 1987 to march 1989.

During this period he totally redesigned the wintering activities at Dakshingangotri.

During this process he certainly dis agreed on some of the issues with Department of ocean development .Because of this his service was side lined.But Engineer in chief of Indian Army

wrote a letter to Army chief

highlighting this.

After 5 years of returning from Antarctica Ganesan was awarded Vashisht Seva Medal by the President of India on 26 Jan 1994.

1. I would like to bring to your notice a case of grave injustice being done to an officer who was recommended for an award, but not approved by the erstwhile Screening Committee.

- 2. As you are the Chairman of the current Screening Committee for Awards, I thought it is my moral duty to bring to your notice the case of IC-21773 Col P Ganeshan of Corps of Engineers. Col Ganeshan was selected by me, when I was the E-in-C, to be the leader of the Antartica Expedition both for summer and winter parties. This officer stayed on for the full winter carrying out various tasks assigned to him by the Department of Ocean Development under adverse and isolated conditions. Apart from this, I had given him number of combat engineer tasks which he performed extremely well. He is also the first person, most probably in the world, who did para sailing in the Antarctica.
- 3. Since I had retired as E-in-C, I had taken the opportunity of having him recommended for an award by my successor Lt Gen YP Khurana, PVSM. Unfortunately due to procedural problems, his case was not considered as A rmy HQ wanted the recommendation to be processed by the Min of Science & Technology. This year also his case has been recommended by the present E-in-C, Lt Gen VN Kapur, PVSM, but I am not sure whether it will be considered because of being time barred. I would like to mention that the officers of Navy & Air Force, who have only served in the summer team and stayed there for three months, have all received awards, whereas Col Ganeshan having spent over 18 months has yet to get an award.
- 4. Since this will be his last chance, as he is retiring by the middle of next year, I would strongly recommend that the officer be given his due recognition by conferring an award on him otherwise it will be a grave travesty of justice being done. In case the officer has not been recommended, I would request that I may be given an opportunity to explain the case to you in person, as time is very short before the list is finalized.

Vujicic was born in Melbourne, Australia, in 1982 to Dušanka and Borislav Vujičić, Serbian immigrants from Yugoslavia. [5][6] He was born with tetra-amelia without fully formed limbs. According to his autobiography, his mother refused to see him or hold him when the nurse held him in front of her, but she and her husband eventually accepted the condition and understood it as "God's plan for their son." Vujicic has two small and deformed feet, one of which he calls his "chicken drumstick" because of its shape.[8] Originally, he was born with the toes of that foot fused. An operation was performed to separate the toes so that he could use them as fingers to grab, turn a page, or do other things. [9] He has been able to use his foot to operate an electric wheelchair, a computer and a mobile phone. Vujicic attempted suicide but notes that he had an "amazingly normal childhood."[citation needed]

Vujicic thrived in his teenage and young adult years despite being bullied. After his mother showed him a newspaper article about a man dealing with a severe disability when he was seventeen, he started to give talks at his prayer group. [10] Vujicic graduated from Griffith University at the age of 21 with a Bachelor of Commerce degree, with a double major in accountancy and financial planning. [citation n]

In 9 March 2002, he moved to <u>California</u>. In 2008 in <u>McKinney, Texas</u>, near Dallas, he met Kanae Miyahara, the Mexican-born, Texas-based younger daughter of a Japanese agricultural engineer and a Mexican mother. She had come to hear him give a motivational speech. [18][19] They married on 12 February 2012. The couple have four children [21][22][23][24] and reside in <u>southern</u>

The power of Thoughts.

The Rose alergy

Being positive or negative are habits of thoughts that have a very strong influence on life.

when you consistantly maintain a positive frame of mind, you will become known as a problem solver rather than a complainer.

Can you believe the bare footed person in dhoti un-ironed zabhbha and topi, walking along side PM is not a Farmer but he is an extraordinary one and its worthwhile to know about him.

He is Dr. Sambhaji Bhide, Gold medallist in atomic physics, worked as a professor in prestigious Fergusson college in Pune. He has received more than 100 National & International awards and guided 67 Doctoral and post Doctoral research work. He was even appointed in the advisory board of NASA and Pentagon which no Indian Scientist has achieved.

Now he is doing social service with 10 lakh youths following him in Maharashtra. His aim is to serve the country till he dies. He wears only white khadi clothes. Walks without Chappals, any distance and always prefers it. In these days n times, what a great person, serving a great motherland. Youth should know about him. So request everyone to forward this post..

Chairman, TATA Steel was holding a weekly meeting with Tata Steel staff in Jamshedpur. A worker took up a serious issue. He said the quality and hygiene of toilets for the workers was very bad. Whereas, he pointed that the cleaniness and the hygiene of executive toilets was always very good. Chairman asked his top executive how much time he needs to set it right. The executive asked for a month to set it right. Chairman said "I would rather do it in a day. Send me a carpenter." Next day, when the carpenter came, *he ordered the sign boards to be swapped*. The sign board on the workers' toilet displayed "Executives" and the Executives' toilet displayed "Workers". Chairman then instructed this sign to be changed every fortnight. The quality of both the toilets came at par in the next three days. "The Leadership is something much more than being an Executive"_* *Learning from this message:*-

_Problem identification requires critical thinking.

But problem solution requires creative thinking.
